Note.—Until the end of 1953, annual data for births, deaths and marriages are based on tabulated figures by month of occurrence on the basis of residence. Data for 1953 have been revised accordingly. Monthly figures for 1954 are provisional and represent registrations filed in Provincial Vital Statistics offices during the month under review, regardless of the month of occurrence.

(a) Exclusive of stillbirths.

(b) Not applicable to figures of population.

(c) Yukon and North-West Territories not included in figures for births, marriages and deaths. Newfoundland is included as of January, 1951.

O'Accrused set income of farm operators from farm production. The seasonally adjusted data include an arbitrary smoothing of crop production, standard seasonal adjustments for live-stock items and a seasonal adjustment for exmings of the Canadian Wheat Board. Because of the arbitrary elements too precise an interpretation should not be given the seasonally adjusted figures for this item.

"This item differs from column 4, top of page 7, in that it excludes undistributed earnings (and the inventory valuation adjustment) of the Canadian Wheat Board. Source: Quarterly Reports; National Accounts, Income and Expenditure, D.B.S.

Note.—These estimates are derived from a sample survey and are subject to sampling error. In general the smaller the estimate the larger is the relative sampling error. Newfoundland included in estimates from October, 1949.

Annual data for 1962 are quarterly averages.

The series are revised to include estimates relating to certain remote areas not covered in previous surveys.

^{*}Estimates based on values of monthly sales, or shipments, as reported by a sample of manufacturing establishments. In industries where long-term contracts involve the receipt of progress payments, all such payments are treated as sales. The trend established for each industry is applied to the gross value of shipments universe for the industry from the Annual Census of Industry Survey.

Note.—The series on Unfilled Orders has been revised and a series on New Orders added.

(i) Estimated total unfilled orders on books at end of month, irrespective of work done on them or of stocks from which they can be filled, but less progress receipts in industries working on long term contracts. Sales in these industries include progress receipts. Estimates are derived by inflating the monthly reported values to total for each industry on the basis of the estimated total values for each industry at the end of December, 1953. The latter were obtained from a survey of all manufacturing firms with a production value uver \$40,000.

The sample of firms reporting monthly accounted for 75% of the total estimated Unfilled Orders Value in December, 1953.

(ii) Total New Orders received during the period, at estimated selling values. The series covers total New Orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and also be reported as shipments in the month received) or whether they will be added to existing backlogs.

Note: Newfoundland is included as of April, 1949, in data for wood pulp and newsprint.

"Monthly totals are not equivalent to annual data which include Newfoundland and Yukon and North West Territories for which only annual statistics are collected.

"Total pulp production covers "screenings" which are already included in exports. "Screenings" are excluded throughout from mechanical and chemical pulp.

"Mill shipments and Stocks on Hand of Sawmills, D.B.S.

"Construction of dwelling units.

Note.—These data are the results of a nation-wide survey carried out each month by the Bureau of Statistics with the co-operation of the Central Mortgage and Housing Corporation. All Metropolitan Areas and Urban Centres with a population of 5,000 or more are enumerated completely. Approximately 400 sample areas lying outside these municipalities are also chosen for complete enumeration.

O'The coverage was extended to 507 municipalities in 1948, and as of 1955, stands at 823, minor revision still being required in the table, due to the non-receipt of returns from a few small places. No account is taken of the building activity outside of registration areas. Actual operations normally follow the granting of permits but a number of projects are not undertaken or abandoned. The amount depends upon the statement of the applicant and considerable change may develop before the completion of the operation.

(3) As of January, 1950, Newfoundland is included.

Note.—This series gives total new settled-for ordinary insurance sales in Canada, exclusive of revivals, increases, dividend additions, reinsurance acquired and months without insurance. Totals are estimates projected from the sales reported by 29 companies operating in Canada representing 90 per cent of new ordinary insurance sales. "Monthly data for 1955 are not strictly comparable with those of 1954 due to several company changes in the manner of reporting new business. On a comparable basis, the Canada total in January, 1955 was 18% above that of January, 1954. Note.—The definition of profits before taxes is based mainly on the accounting definitions used by corporations. However, depletion charges are added back to not profits while Canadian dividends received are excluded from profits in order to avoid duplication. The term "profits" as used here means the total profits of all companies earning profits less the losses of all companies incorporated in Canada (statisting government-owned companies and incorporated co-operatives).

On Includes, in addition to the industries listed, Agriculture, Forestry, Fishing and Construction.

Rubber, Leather, Non-Metallic minerals, Petroleum and Coal and Miscellaneous Manufacturing Industries.

Source: Quarterly Corporation Profits, D.B.S.

WFor 1953 and 1954, these totals do not equal the sum of the totals for the individual groups. It is estimated that total profits before taxes may exceed the sum of the groups by about \$11,000,000 per quarter in 1953 and \$14,000,000 per quarter in 1954. Although the totals have been adjusted by these amounts it is not possible at present to allocate the differences to the individual groups.

^{*}Assignments made under the Bankruptcy and Winding-Up Acts. (1) Quarterly data for the last five columns are monthly averages. (2) In the Bankruptcy Ast of 1949, provision is made for proposals from insolvent persons. Since July, 1950, agreements made under this method are not included with the statistics of bankruptcies. Liabilities of insolvent persons making proposals are not available.
